LIGHTHOUSE CHARTS

LightHouse Charts bring a new level of clarity to marine navigation. Created from official hydrographic chart sources, LightHouse Charts offer maximum readability, intuitive navigation, and superior quality. Four distinct colour palettes provide the best possible viewing conditions around the clock and chart symbol controls give you the power to customise the charts to your personal preference. Subscribe to LightHouse Charts Premium to access continuous chart updates, an expanded points of interest (POI) library, and enhanced satellite imagery for a powerful, sophisticated take on marine navigation.

PROFESSIONAL OR LEISURE CHART STYLE

Toggle between the information-rich professional S-52 government chart style (left) and the LightHouse leisure chart style (right) for your preferred view of key cartographic data.

ENHANCED CHART SYMBOL CONTROL

Change the size of channel markers, points of interest, and other icons for complete control over chart details.

LIGHTHOUSE CHARTS

NAVIGATE WITH A REAL-WORLD VIEW

Access Mapbox-powered high-resolution satellite imagery for a complete view of streets, shorelines, and shallows for informed decision making.

EXPANSIVE POINTS OF INTEREST LIBRARY

Quickly find local marinas, fuel stops, service stations, and more with an ever-expanding points of interest library from the best marine databases.

FLEXIBLE COLOUR MODES

Day, Dusk, Dark, and Bright Sun colour palettes help your vision keep up with changing light conditions for clear, strain-free chart viewing.

STAY UP TO DATE AND EXPLORE MORE

The Raymarine mobile app and a LightHouse Premium subscription allow you to update your charts and download premium content using your mobile phone.

Raymarine

The easy-to-use operating system inside every Raymarine chartplotter display, LightHouse[™] puts you in command with a fluid touchscreen or HybridTouch[™] user experience. LightHouse lets you navigate with the best charts and makes navigating as simple as using a smartphone.

You Are In Command

LightHouse 4 is fast, fluid, and easy to learn. The uncluttered interface is easily personalised for your style of navigating. Get underway with smartphone-like touchscreen experience or take command with HybridTouch keypad and touchscreen control combined.

Simplified Networking

Axiom+, Axiom 2 Pro and Axiom 2 XL all run the LightHouse 4 operating system, allowing you to create navigation systems with any Axiom display combination. Connect up to 10 Axiom displays.

Expandable

Expand any LightHouse 4 OS based display with powerful sensors, including Quantum radar, CHIRP sonar modules, and FLIR thermal night vision cameras. SeaTalk^{NG} and NMEA 2000 connectivity enable engines displays, instruments, and Evolution autopilot integration. Standard Wi-Fi and Bluetooth allows connection to Raymarine apps, accessories and more.

LIGHTHOUSE 4

The LightHouse 4 operating system powers Axiom+, Axiom 2 Pro and Axiom 2 XL chartplotters displays. Previous generation Raymarine eS Series and gS Series can upgrade to LightHouse 3.11 for free. Some advanced LightHouse 4 features like ClearCruise AR, Performance Sailing Tools, and LightHouse Apps are exclusive to Axiom chartplotter displays. Visit raymarine.com/lighthouse to learn more and stay abreast of the latest LightHouse 4 feature updates.

Advanced Engine Integration

The LightHouse operating system is your gateway to engine integration. Create custom dashboards using NMEA2000 or enjoy advanced integration with Mercury VesselView and Yamaha Command Links outboard engines.

Personalisation

The LightHouse 4 home screen offers bold and simple app icons. Customise the home screen with your favourite apps. LightHouse 4 User Profiles saves yours and other crew member's personal home screens and configuration preferences.

Modern Vessel Automation

The LightHouse OS puts you in total command of the vessel's electrical systems with support for CZone, Empirbus, and Raymarine YachtSense digital control systems. Experience simple touch screen control of lighting, pumps, HVAC systems and more from anywhere onboard.

Performance Sailing Tools

Stay ahead of the competition with Lighthouse 4's performance sailing tools including Dynamic Layline overlays, which can be optimized with your vessel's polar performance targets. The LightHouse Dashboard app offers Race Data and Sailing specific graphical displays in a big, bold, and simple to understand format. A slideout Race Start Sidebar gives you quick access to critical race stats.

LightHouse Apps

LightHouse Apps is Axiom's expanding library of marine and entertainment apps. Enjoy entertainment apps like Netflix and Spotify or network with onboard systems like Lumishore, Victron, and Seakeeper. LightHouse Apps also keep you connected and informed with support for Mazu satellite, Predict Wind, and Theyr weather.

LightHouse OS Updates

Visit raymarine.com to learn about the latest LightHouse 4 new features and upgrades.

* Brightness is model dependent

The Element S series of navigation displays gives you the freedom to enjoy the open waters—Select your destination and let Element's fast and accurate 10Hz GPS/GNSS lead the way. Engineered for simplicity and affordable performance, Element S will quickly become your trusted cruising companion. A quad-core processor offers responsive performance and Element's all-weather, sunlight viewable displays deliver chart and navigation data in beautiful colour. Element's simple and straightforward LightHouse Sport operating system lets you navigate with confidence. Once underway, Element S will keep you on course with a smart list of userfriendly features, such as AIS target overlays, autopilot integration, and sailing instruments displays. Element S is also compatible with Quantum Wireless Radar.

Quantum CHIRP Radar

Element S helps to navigate congested waterways with increased awareness and confidence using an optional Raymarine Quantum wireless CHIRP radar* or an AIS receiver. Quantum brings award-winning solid-state radar capability and Element S's AIS overlays intelligently identify approaching targets.

*Element is only compatible with Quantum Wi-Fi only radar models.

Simple and Straight Forward

Element's LightHouse Sport OS is designed for boaters that like to keep things simple. The LightHouse Sport OS and Element's ergonomic keypad are easy to customize, and an oversized waypoint key allows for quick marking of your favourite locations, plus three user-programmable quick keys provide access to your favourite pages with one button push.

Superior Performance

Enjoy legendary Raymarine performance at an affordable price with 7, 9, and 12 inch super-bright displays for all weather conditions. Element features a fast quadcore processor, for quick chart redraw and responsive performance coupled with a precision 10hz GPS/GNSS sensor. Element is backed by Raymarine's three-year warranty (product registration required).

FRESHWATER FISHING AND COASTAL FISHING

Built for anglers that want to be one step ahead of the game, Element delivers the sharpest view of the underwater world with HyperVision[™] 1.2 megahertz super high-resolution sonar. HyperVision takes DownVision, SideVision, and Raymarine RealVision 3D sonar to the next level of precision imaging and fish identification, letting you see structures, vegetation, and fish with lifelike clarity.

Simple, Fast Operation

Element's LightHouse Sport operating system with intuitive keypad control lets you quickly mark fishing spots and access your favourite pages with the press of a button. Quad-core performance delivers instant chart redraw, smooth 3D imaging, and fast response while on the water.

All-in-One Transducer

The compact HV-100.02 transducer is simple to install and supports RealVision 3D, DownVision, SideVision, highfrequency CHIRP and 1.2 MHz HyperVision. A high precision water temperature sensor is standard, and the HV-100.02 is convertible for transom or trolling motor mounting. Through-hull versions are also available.

See More with Precision Sonar

Element's 1.2 megahertz HyperVision[™] takes sonar to a new level of precision. DownVision, SideVision, or stunning RealVision 3D, Element's HyperVision[™] mode lets you view structure and target fish with lifelike clarity, helping you to see and catch what other anglers can't.

All the Best Maps

Element's powerful chartplotter supports Raymarine LightHouse Charts, Navionics, C-MAP, Standard Mapping, CMOR Mapping, and many other publishers. Make custom bathymetric maps on the fly using Raymarine's new RealBathy[™] or Navionics SonarChart Live.

ELEMENT®

PART NO.	DESCRIPTION	
ICE FISH	ING ACCESSORIES	
A80581	Raymarine Element Ice Fishing Kit (Bag, Battery, Charger, Mount, Transducer & Float)	
A80583	CPT-S Plastic Conical HIGH CHIRP Ice Transducer for Element HV with 2.5m cable	
R70724	Element Ice Fishing Power Cable 300mm	

- 1. Element display
- 2. Surface mount gasket
- 3. Suncover
- **4.** Trunnion knobs x2
- 5. Documentation pack
- 6. Trunnion bracket
- 7. Surface mount stainless steel fixings x4 (M4x40 machine screw, M4 flat washer, M4 locking nut)
- 8. Power / NMEA2000 cable (includes 1.5m (4.92ft) power lead and 0.5m (1.64ft) NMEA2000 lead).

FISHING

Axiom is expandable, so its capabilities can grow, as needed. It supports the full range of Raymarine sensors accessories, including Quantum radar, CHIRP Sonar, FLIR thermal cameras, audio integration, instruments, cameras, and Evolution autopilot. Standard Wi-Fi and Bluetooth connectivity allows connection to the latest Raymarine apps for tablets and smartphones.

CRUISING

Award Winning Performance

Axiom's intuitive LightHouse 3 operating system, quad-core performance, and innovative technologies like ClearCruise Augmented Reality, Quantum Doppler radar, and RealVision 3D have earned Axiom multiple prestigious industry innovation awards.

Expandable

Connect Axiom with radar, FLIR thermal, instruments, Evolution autopilots, and much more. Wi-Fi and Bluetooth connect you to LightHouse Apps and entertainment. Axiom networks seamlessly with Axiom Pro and Axiom XL displays so you can build a custom navigation system that fits your needs.

Sonar Built-In

See the underwater world in an entirely new way with Axiom's available CHIRP DownVision, SideVision, and RealVision® 3D sonar. Axiom also supports highfrequency CHIRP and 600-watt, dual-frequency digital sonar. Alternatively, Axiom displays are available in GPS chartplotter only versions.

Rugged All Glass Display

Axiom is available in 7, 9 or 12-inch sizes to fit any vessel. Axiom's rugged all-glass display is optimised for flush or surfacing mounting and looks great on any helm. Raymarine's super-bright LED display technology with optical bonding delivers superior visibility day or night.

AXIOM®+

SAILING

EISHING

The performance-tuned Axiom+ is a new generation of award-winning Raymarine chartplotter displays. Optimised for speed, Axiom+ is equipped with a powerful quad-core processor for industry-leading responsiveness and speed, giving you the power to seamlessly redraw charts, navigate with augmented reality, and experience RealVision 3D sonar.

CRUISING

Fast and Fluid Fluid and fast chart redraw of new Raymarine LightHouse Charts, plus Navionics and C-MAP.

LightHouse 4 OS Smart and intuitive LightHouse 4 OS makes navigating easy.

Quad-Core Power

Powerful quad-core processor, plus increased onboard storage for personal data and apps.

Augmented Reality ClearCruise™ Augmented Realitycapable for smarter navigation decisions.

HydroTough[™] Display

Nano-coated, impact-resistant glass screen repels water, oil, and smudges for better viewing and accurate touch controls.

Brighter

Axiom+ 7, 9 and 12 inch all-weather displays are 25 percent brighter (up to 1,800 nits) than original Axiom models.

Sharper

IPS display technology delivers wider viewing angles and sharp contrast at twice the resolution of traditional displays.

3D Sonar Built-in Available with built-in RealVision 3D sonar for the most comprehensive view of the underwater world.

CRUISING / WORKBOATS / LAW ENFORCEMENT

OFFSHORE FISHING

Our most powerful Axiom ever, Axiom 2 Pro, is upgraded with faster processors, superior displays, improved ergonomics, and the incredibly intuitive LightHouse 4 operating system. Get underway faster and confidently with Axiom 2 Pro's HybridTouch[™] — a simple touchscreen experience plus reliable keypad control. Axiom 2 Pro chartplotters feature built-in wide-spectrum CHIRP sonars for fishing and navigation. Choose Axiom 2 Pro S models with a single High CHIRP sonar channel, or take your fishing to the max with Axiom 2 Pro RVM models, with 1kW CHIRP and RealVision MAX sonar technology.

More Power

Get underway faster with Axiom 2 Pro's lighting-fast 6-core processor.

HybridTouch

Plan and plot your course with fluid touchscreen control and take command with confident keypad control when seas are rough.

Customise

An interchangeable keypad gives you a choice an autopilot controls or user-programmable soft keys.

Find More Fish with RealVision MAX

RealVision MAX upgrades DownVision, SideVision, and 3D sonar with increased range, better resolution, and sharper fish targets

HydroTough Displays

Engineered to perform in extreme environments. HydroTough™ nano-coating technology repels water for reliable touchscreen control and enhances colours and sunlight visibility.

Navigate Smarter

Chartplotter, sonar, radar, autopilot, and video integrated together seamlessly with the super easy LightHouse 4 operating system.

Automatic Display Brightness

An ambient light sensor automatically adjusts display brightness for day and evening lighting conditions.

Network Like a Pro

Build a system with multiple Axiom displays and expanded video options, including HDMI output for remote displays and TVs.

CRUISING LUXURY YACHTS SUPERYACHTS

OFFSHOF FISHING

Axiom 2 XL, the flagship of the Axiom family, delivers powerful chartplotter performance, stylish large-format navigation, and the elegant simplicity of the LightHouse 4 operating system. Designed for all weather conditions, the rugged yet beautiful Axiom 2 XL displays are at home in open cockpits or enclosed glass bridge stations. Enhanced with powerful 6-core processors, expanded networking, and ultra-bright HydroTough displays, Axiom 2 XL is the premium chartplotter for captains who demand the best. Axiom 2 XL displays are available in 16, 19, 22, and 24-inch diagonal display sizes.

Glass Bridge

Axiom 2 XL offers the largest possible displays with the smallest overall footprint. Experience big-screen navigation even on tightly spaced helms.

More Powerful

Get underway faster with our most powerful 6-core chartplotter processor.

Remote Control

Add the RMK-10 keypad and enjoy complete remote keypad control of each Axiom 2 XL at your helm.

Advanced Video Integration

HDMI input, HDMI output, and USB touchscreen input lets you integrate with Axiom 2 XL with remote computers and HDTV monitors.

HydroTough Displays

Engineered to perform in extreme environments. HydroTough[™] nano-coating technology repels water for reliable touchscreen control and delivers enhanced colours and sunlight visibility.

Navigate Smarter

Chartplotter, sonar, radar, autopilot, and video integrated together seamlessly with the intuitive LightHouse 4 operating system.

Automatic Display Brightness

An ambient light sensor automatically adjusts display brightness for day and evening lighting conditions.

Superior Networking

Create a glass bridge helm with multiple Axiom 2 XL displays and expanded video options, including 3 power-over-ethernet Raynet ports for video camera connectivity.

Raymarine

RVX1000 SONAR

INSHORE AND OFFSHORE FISHING

The RVX1000 offers all of the sonar performance and features of Raymarine Axiom Pro in a remotely mounted black box sonar module. With Raymarine's award winning RealVision 3D sonar technology, CHIRP Side and DownVision, plus a high powered 1kW dual channel CHIRP sonar, the RVX1000 is a versatile sonar solution for both inshore and offshore fishing.

CHIRP DownVision

CHIRP DownVision® delivers a photo-like view of the world beneath your boat, allowing you to image bottom structures with amazing detail and simultaneously target fish.

CHIRP SideVision

CHIRP SideVision® sonar expands your underwater horizon with bank-to-bank displays of fish, bait and underwater structures. SideVision lets you see further, see more clearly, and detect more fish than traditional side scanning sonars.

CHIRP DownVision

RVX1000 has built-in low power, high frequency CHIRP plus 1kW high power CHIRP supporting low, medium and high frequency bands. Dual transducer connections let you customise your sonar system with a wide range of transom mount, in-hull and through-hull options.

RealVision 3D

RealVision[™] 3D give anglers the ability to see what's below, behind, and to the sides of the boat, all at once and in three-dimensions. RealVision 3D displays the entire underwater world—including structure, cover, fish and forage. Pan, tilt, and zoom the 3D image to examine from any angle.

RVX1000 SONAR

Raymarine

RVM1600 SONAR

INSHORE AND OFFSHORE FISHING

The RVM1600 with RealVision MAX technology takes Raymarine multi-channel CHIRP sonar performance to a new level. The next generation of DownVision, SideVision, 3D, and conventional CHIRP sonar, RealVision MAX delivers vivid sonar imagery and fish targets like never before. RealVision MAX starts with all-new high-performance RealVision CHIRP transducers, upgraded with larger elements and increased power output for extended-range performance. Next, RealVision MAX CHIRP signal processing and faster ping rates improve visual fidelity and target identification. With RealVision MAX, structure is more recognizable, and the most elusive fish are easily identifiable with high-contrast RealVision MAX sonar colour palettes.

Multi-Channel Sonar

The RVM1600 is equipped with both a 1 kW dual-channel CHIRP sonar plus RealVision MAX sonar channels, including High CHIRP, SideVision, DownVision, and 3D channel.

Maximum Clarity

RealVision MAX CHIRP sonar processing, combined with faster ping rates, delivers superior sonar imagery in CHIRP, Side, Down, and RealVision sonar channels.

Maximum Fish

New RealVision MAX high contrast colour palettes and fish targeting enhancements help you positively identify fish and bait.

Maximum Range

More powerful RealVision MAX CHIRP transducers with a 600-watt conical High CHIRP element and upgraded Side and DownVision elements deliver better fishfinding on longer-range scales.

CHIRP DownVision

CHIRP DownVision[®] delivers a photo-like view of the world beneath your boat. See bottom structures and fish targets with amazing detail.

CHIRP SideVision

CHIRP SideVision[®] sonar expands your underwater horizon with bank-to-bank displays of fish, bait, and underwater structures. See further and see more fish than traditional side scanning sonars.

Conventional CHIRP

RealVision Max transducers feature a 600-watt high-frequency conical CHIRP element for coastal fishing. A separate 1kW dualchannel CHIRP sonar for offshore fishing with a wide range of transom, in-hull and through-hull options.

3D Sonar

RealVision MAX 3D sonar lets anglers see sonar data in a lifelike 3D perspective view. Use 3D sonar to pinpoint that elusive wreck or setup the perfect drift.

RVM1600 SONAR

RVM-400 Through-Hull Transducer

RVM-100 Transom-Mount Transducer

CP100 SONAR

CP100 DownVision Sonar Module

The CP100 network sonar module brings CHIRP DownVision technology to Raymarine's chartplotters displays. CP100's CHIRP DownVision delivers a photo like view of the world beneath your boat, allowing you to image bottom structure with amazing detail and target fish simultaneously.

CP370 SONAR

OFFSHORE AND COASTAL FISHING

The CP370 delivers exceptional clarity, sharper fish targets, and automatic operation using Raymarine's next-generation ClearPulse[™] digital sonar processing. The CP370 boasts up to 1,000 watts of power and operates at 200kHz for inshore and 50kHz for offshore fishing. ClearPulse[™] signal processing intelligently manages the CP370 sonar parameters in all conditions so anglers can spend more time fishing and less time adjusting the sonar.

CP470 & CP570 SONAR

With ten times the resolution of ordinary sonars, the CP470 and CP570 CHIRP sonar modules deliver sharper, more defined fish targets, and automatically filter out unwanted noise. Pair these powerful CHIRP sonar modules with any Axiom chartplotter, and you will never miss any of the action below.

Serious Offshore Sonar

Using a choice of Low, Medium, or High frequencies the CP470, and CP570's advanced CHIRP transceivers can see through dense schools of baitfish, identify thermoclines, and simultaneously target desired game fish.

Best-in-Class Target Separation

The CP470 and CP570 deliver superior target definition and enhanced sensitivity using Raymarine's exclusive wide spectrum CHIRP sonar technology.

CP470 2kW CHIRP

Target fish, identify bait, and track the seafloor down to 10,000ft. (3,000m) with two adjustable CHIRP sonar channels.

CP570: Up to 4kW of Power

Step up to the CP570 with a combined 4kW of CHIRP sonar power. Hunt for fish in different parts of the water column with the CP570's two fully independent 2kW sonar channels.

QUANTUM RADAR

Day and night, radar systems from Raymarine keep you aware of surrounding traffic, hazards and obstacles, approaching weather and so much more. Use your radar to navigate in dense fog or rain. Confirm your boat's position with super-accurate radar ranges. Let MARPA help you navigate safely through a crowded harbour. Enjoy map-like coastal detail when cruising offshore. Raymarine offers a wide range of radar solutions for all types and sizes of boats.

Compact Performance

Quantum radars use solid-state CHIRP pulse compression technology to deliver superior target awareness at both long and extremely short ranges. FLIR's exclusive ATX[™] advanced target separation technology displays targets like boats, buoys, and landmarks with exceptional resolution and separation quality.

Energy Efficient

Quantum radars solid-state technology consumes very little power, making Quantum especially friendly to vessels running on battery power. Solid-state radar technology also generates very low radiated emissions.

Quantum 2 with Doppler

Quantum 2 with Doppler elevates your awareness by detecting radar frequency shifts returned by moving versus stationary targets. Quantum 2 then colour codes inbound targets red (dangerous) and outbound targets green (safe), making it easy to discern potentially hazardous situations when navigating in high-traffic areas.

Simple Installation

With every Raymarine Quantum system, you'll also benefit from a rugged and lightweight design that is easy to install. Quantum 2 can be installed in a traditionally wired configuration, or use built-in Wi-Fi technology to connect directly to your Raymarine MFD.

NEW

Quantum is now available in black.

Magnum Open Arrays

Magnum[™] high-performance open array radars bring long-range performance and enhanced small target radar imaging to Raymarine multifunction navigation displays. Employing many of the same radar technologies trusted by the United States Coast Guard, Magnum offers intelligent target tracking and reliable performance, all packaged in a sleek open array pedestal built to withstand the elements.

Long Range Performance

Magnum is available in 4kW or 12kW power output options and with either a four-foot or six-foot antenna array option. Magnum radars offer a maximum range up to 96nm for 12kW models – ideal for blue water vessels – and up to 72nm for 4kW models.

Choice of the Pros

Magnum radars are built upon the same radar technology Raymarine provides to the United States Coast Guard, so you can trust Magnum to deliver with professional features like beam sharpening technology for enhanced detail and bearing resolution. Combine Magnum with Axiom and take advantage of True Trails target history display and real-time heading updates.

Magnum radars feature dual-range

scanning enabling them to work

simultaneously at a short range

a long range scale for coastal

navigation. Magnum also has

when tracking contacts at

close range.

scale for collision avoidance and

automatic 24 or 48 RPM antenna

rotation speed for faster updates

Cruising Tools

Enhanced Target Awareness

Magnum delivers better situational awareness with fully automatic MARPA target acquisition and tracking. Magnum also makes use of Raymarine's Evolution or AR200 9-axis heading sensor technology to provide real-time, accurate target plots.

Cyclone Solid-State Open Array Radar

Cyclone radars are the ultimate expression of design, rugged performance, and unmatched situational awareness. Tackle the harshest conditions with the confidence of Cyclone's solid-state CHIRP pulse compression technology and aircraft wing-inspired design. Each model features innovative detection capabilities, including Cyclone Bird Mode, RangeFusion[™] technology, and high-speed 60 rpm imaging.

Engineered for Extremes

The aircraft-wing-inspired design delivers a best-in-class 100knot wind rating and meets the commercial grade IEC 62388 standard for ship bourne radar.

Real-Time Target Tracking

Fast 60 RPM rotational speed delivers 360 degrees of awareness and accurate target tracks in real-time.

Safer Navigation with Doppler

Doppler target tracking simplifies the interpretation of dangerous and safe targets for added safety.

Professional grade ARPA

Cyclone automatically tracks up to 50 targets using the same advanced ARPA technology trusted by the United States Coast Guard.

RangeFusion[™] Technology

Cyclone combines short and long pulses into a single high clarity radar image, simultaneously delivering exceptional shortrange and long-range targets.

Enhanced Cyclone Bird Mode

Cyclone CHIRP pulse compression technology intelligently optimizes gain and tune settings for imaging distant sea birds.

Three Array Size Options

4- and 6-foot options deliver superior target separation and range, while the 3-foot array provides open array performance in tight spaces.

Two Power Output Options

The base model Cyclone operates at 55 Watts. Step up to improved weather and long-range performance with 110 Watt Cyclone Pro.

CYCLONE RADAR

Doppler Target Tracking

Precise shore line detail and long range target separation

RangeFusion combines short and long pulses into single image

Performance tuned for locating sea birds

CYCLONE RADAR

PART NO.	DESCRIPTION					
Radar	Accessories					
RADOME	RADOME MAST MOUNTS					
A80382	Mast Mount Bracket for Quantum Radome Scanner					
M92722	Mast Mount Bracket for 18" (456mm) Radome Scanner					
M92698	Mast Mount Bracket for 24" (608mm) Radome Scanner					
X10006-SCA	Radar Guard for M92722 suitable for 18" radome (not compatible with Quantum)					
SELF LEV	ELLING RADOME MOUNTS					
X10000-SCA	Self levelling mast mount for 18" / 24" radome scanner					
X10001-SCA	Self levelling backstay mount (forward mount) for 18" / 24" radome scanner					
X10002-SCA	Self levelling backstay mount (aft mount) for 18" / 24" radome scanner					
ACCESSO	ACCESSORIES					
A80007	HS-5 Network Switch (Raynet)					
A80731	RNS5 Gigabit Raynet Network Switch					
A80732	RNS8 Gigabit Raynet Network Switch with 4 x POE ports					
A80162	RayNet (M) to RayNet (M) cable - 100mm					
A80160	RayNet (F) to SeaTalkHS (F) adaptor - 400mm					
E55060	SeaTalkHS Crossover Coupler					
4115028	Weather proof Ethernet coupler					
E70096	Evolution EV1 Sensor Core					

CYCLONE RADAR

The culmination of Raymarine's' autopilot expertise and advanced aerospace guidance technology, Evolution Autopilots, delivers a new level of precision steering control. Each Evolution Autopilot system consists of the following components: an Evolution 9-axis sensor core, an actuator control unit (ACU), a drive mechanism, and a control head.

EV-200 INBOARD

The EV200 system pack controls vessels with any Type 1 drive unit (Hydraulic, Linear, Sail or Power).

EV-400 INBOARD

The EV400 pack controls vessels with any Type 1 to Type 3 mechanical or hydraulic drive units.

Type 1/2 Rotary Drive

Type 1 Hydraulic Pump

Type 1/2 Linear Drive

FISHING

Type 1/2/3 Hydraulic Pump

EV-2 has been designed for the latest drive-by-wire steering systems and connects directly to Raymarine's SeaTalk^{NG} bus.

Includes: Volvo; Teleflex Optimus; Xenta; Yamaha and more.

EV-300 SOLENOID INBOARD

The EV300 system is for use with electric solenoids that control the vessels hydraulic steering system.

EV-100 WHEEL

The EV-100 wheel pilot comprises a fully enclosed wheel-drive for simple installation and superb autopilot performance.

EV-100 TILLER

The Raymarine EV-100 Tiller Pilots are perfect for large tiller steered yachts up to 6,000kg (13,200 lbs) displacement.

EV-100/EV-150 POWER PILOT

For single outboard powered boats with hydraulic steering, the EV-100 and EV-150 deliver perfect steering using Raymarine's exclusive Hydro-Balance[™] technology.

			UTOPILOTS			
Cockpit Pilot	Maximum				Pack Content	s
Description	Displacement	Vessel Type	EV	ACU	Control Head	Drive
EV-100 Wheel	7,500kg (16,000lbs)	Sail	EV-1	ACU-100	p70s	Wheel Drive
EV-100 Tiller	6,000kg (13,200lbs)	Sail	EV-1	ACU-100	p70s	Tiller Drive

Remember to always take the fully laden displacement weight of your vessel into account (often 20% above the designed displacement).

ALPHA PERFORMANCE DISPLAYS

SAILIN(

NEW

The Alpha series are high-visibility touchscreen displays with fully customisable marine instrument data and graphic displays to help you make smarter sailing decisions. Designed for helm or mast mounting, the Alpha Series is customised and controlled via its touchscreen and controlled remotely from a networked Axiom Chartplotter*.

ALPHA KEY FEATURES

- Customisable sailing, navigation, and engine instrument displays.
- SailPoint[™] mode provides you with a visual reference of target wind angle, so you achieve your maximum VMG upwind or downwind.
- Polarized sunglasses-friendly displays with extra wide viewing angles, viewable on the mast or remote location.

- Tested to the extreme and built with our exclusive HydroTough[™] nano-coating that repels water and oils for reliable touchscreen control.
- Landscape or portrait mounting option.
- Single power and data cable** for fewer cables running through the deck and mast.
- Support for daisy-chaining up to 4 displays.
- Auto-dimming through an integrated ambient light sensor.
- Lockable touch screen with remote control from Axiom.
- Designed to network with Axiom chartplotters for all instrument data, transducer data, and performance sailing calculations.

The Alpha Performance Display requires a Axiom Chartplotter (on Lighthouse 4.5 software or later) connected on the Raynet network.
 ** Power and data cables not included and must be purchased separately to match the installation configuration.

- 8. Supplied with Alpha 9 only 2x mounting brackets.

RSW WIND TRANSDUCER

The Raymarine RSW wind transducer is a professional-level wind sensor designed for leisure sailors. An all-new wind sensor design, the RSW transducer is engineered for simplicity and accuracy using an integrated 3D motion sensor and Raymarine Smart Wind[™] technology to give every skipper a new level of sailing intelligence. The newly designed RSW wind sensor is a self-calibrating sensor that delivers ultraprecise wind speed and direction measurements. Sailors can take advantage of high accuracy, true wind, speed, and polar calculations to make more intelligent race and performance sailing decisions when it matters most.

RSW TRANSDUCER KEY FEATURES

- Experience expert-level accuracy without complicated black box processors or cumbersome calibration tables.
- Integrated 3D motion sensor (AHRS technology) accounts for vessel pitch and roll, automatically delivering improved true wind accuracy.
- Smart Wind technology delivers superior wind measurement by compensating for mast twist and bend.
- Using the 3D motion sensor, the sensor compensates for the effects of airflow and upwash against the sails, delivering stable and trusted true wind direction.
- Rotating mast compatible without any extra sensors.
- Lightweight and durable carbon fibre arm for reliable performance

INSTRUMENTS

Raymarine instruments are world renowned for accuracy, innovative features and high-performance. From the space saving i40 series to the multifunction i70s series, there are Raymarine instruments available to fit every boater's requirements.

i40 Instrument Display

Big displays for smaller powerboats, yachts and RIBs, these compact yet powerful SeaTalk instruments offer full integration with Raymarine autopilots and navigation equipment and can be surface or trunnion-mounted.

i50 Instrument Display

The i50 range consists of 3 digital displays: speed and depth displays with extra-large digits and a multi-line tridata unit. These stylish, dedicated-function instruments are the perfect solution for smaller power boats, yachts and RIBs.

i60 Instrument Display

The i60 Wind Display provides analogue and digital data and calculates apparent (relative) and true wind speed/angle.

i70s Multifunction Instrument

The new i70s Multifunction Instrument is packed full of powerful features but remains exceptionally easy to use. Userselectable data source selection allows for easy integration on multi-sensor networks.

WIRELESS INSTRUMENTS

SAILING

CRUISING

You need instant access to accurate data and displays that are absolutely reliable. Raymarine Wireless instruments display all the data you'll need and there are no wires running through your hull or down your mast.

Micro-Talk Gateway

The Micro-Talk Wireless Performance Sailing Gateway allows you the flexibility to mixand-match any combination of wired or wireless Raymarine instruments, transducers, multifunction displays and autopilots. Whether you are building a new system from scratch, or expanding an existing system, the Micro-Talk Gateway enables performance-minded sailors to take advantage of the enhanced accuracy and installation convenience offered by Raymarine's wireless, solarpowered wind transmitter options.

Wireless for Cruising

Raymarine's wireless instrument systems offer instant access to accurate depth, wind, speed and GPS data. The displays are simple to install, solar powered, and use Micronet wireless networking to communicate. Micronet MN100 series instruments include single line, dual-line and analogue wind display options. A wide selection of optional transducers, sensors and accessories are available to customise your system.

Wireless For Racing

Raymarine wireless instruments deliver a tactical advantage to the club racer or ocean navigator alike. In addition to navigation data, Raymarine wireless racing systems deliver polar data, true wind speed and angle, VMG, compass heading and more. Small screen, large screen and handheld options ensure you have the data you need, where you want to see it.

Race Compass

Raymarine's Micro Compass and Racemaster compass systems give you the winning advantage with accurate, reliable readouts. The self-contained Micro Compass' tactical scale give you clear stable figures for port and starboard tacks. Racemaster is a two tier display that displays heading, wind shift indicator, line bias, and race timer. Both compasses are 100% solar powered, install in seconds, and can be easily removed for storage.

THERMAL CAMERAS

Teledyne-FLIR maritime thermal imaging cameras turn night into day, keeping you safe and secure and letting you boat with confidence. From small boats to superyachts, FLIR offers leading-edge thermal cameras that are rugged, reliable and straightforward to use.

FLIR MTMS

Keep a watchful eye on such critical equipment as engines, exhaust manifolds, and shaft bearings to spot problems before they leave you stranded on the water.

FLIR M232

Our smallest and most affordable pan and tilt marine thermal night vision camera. Using our latest generation Boson[™] thermal core, the M232 lets boaters see at night in 320 x 240 thermal resolution and also features 2x digital zoom.

FLIR M300 SERIES

The M300 Series sets a new standard for safe marine navigation and situational awareness. Applying enhanced stabilization technology to high-performance visible, thermal, or multispectral imaging, M300 Series marine cameras deliver unwavering vision in highstakes environments.

THERMAL CAMERAS

MTMS: IN THE BOX

- 1. MTMS thermal camera
- 2. Cooling bracket
- **3.** PoE injector (Refer to the 'Potential ignition source' warning)
- **4.** T6 Torx driver
- 1 x 1/4" 20 x 30 mm Hex bolt (for fitting cooling bracket to the optional mounting bracket: R70375.)
- 4x No.6 x 25 mm screws (for surface mounting cooling bracket / camera assembly)
- 7. 4x PT 22x8 T6 torx screws (to fit cooling bracket to camera.)
- 4x 10–32UNF 1/2" hex bolts (for fitting cooling bracket to the optional RAM[®] mount 261–2288–00)
- 9. Documentation
- **10.** 5 m (16.4 ft) Ethernet cable (M12 X—coded to RJ45) (for connecting camera to PoE injector)
- **11.** 3 m (9.84 ft) RayNet to RJ45 adaptor cable (for connecting PoE injector to Raymarine MFD or network switch)

M2XX SERIES: IN THE BOX

- 1. Thermal camera
- 2. Thermal camera base-seal
- **3.** 3 x thermal camera fasteners: nuts, dome nuts, spring washers, flat washers, and threaded studs
- 4. 2 x Self-adhesive decals (for ball-down mounting only)
- 5. RayNet-to-RJ45 adapter cable (100 mm)
- 6. Right-angled RayNet-to-RayNet cable (10 m)
- 7. Right-angled 3-pin power cable (10 m)
- Top-down riser kit (includes riser, riser base seal, and riser mounting template)
- 9. Documentation pack

THERMAL CAMERAS

- 1. M300 Camera
- 2. Camera base-seal
- 3. Camera gasket
- 4. RayNet-to-RJ45 adaptor cable 120 mm (4.72 in.)
- 5. Right-angled RayNet-to-RayNet cable 3 m (9.8 ft.)
- 6. Right-angled HD-SDI video cable (with BNC connectors) 3 m (9.8 ft.)
- 7. Right-angled power/NMEA 0183/video cable 3 m (9.8 ft.)
- 8. Mounting riser
- **9.** 3x camera fixings: nuts, dome nuts, spring and flat washers, threaded studs
- 10. 2 x self-adhesive decals (for ball-down mounting only)
- **11.** Documentation pack

VIDEO CAMERAS

FISHING

The CAM300 mini day/night IP camera is a wide field-of-view visible camera designed for Raymarine Axiom chartplotters. Equipped with an HD video sensor, the CAM300 transforms Axiom into a powerful onboard video observation system. Use the CAM300 to monitor blind spots, check in on the crew, or watch and record all fishing action from the helm. Combine the CAM300 with the Raymarine AR200 sensor and make smarter navigation decisions using ClearCruise augmented reality to overlay AIS targets, waypoints and chart objects on the Axiom video display.

- View up to 4 CAM300 video streams simultaneously on a single Axiom display
- 3MP CMOS sensor delivers up to 1080p resolution
- Built-in infrared emitters for excellent near-field low light visibility up to 33 ft (10 meters)
- Image flip and invert functions for ball-up/ball-down installation
 and reverse video
- ONVIF Profile S compatible for compatibility with security system applications
- Easy to install with either direct 12-volt connection or single cable Power over Ethernet (POE)
- Rugged IP66 enclosure for below and above deck marine installations

CLEARCRUISE AR

SAILING

FISHING

ClearCruise[™] AR is bringing enhanced on water perception to Raymarine's family of Axiom[®] chartplotter displays. With ClearCruise AR, Raymarine Axiom users can make smarter decisions with navigation objects overlaid directly on Axiom's high definition video display.

CRUISING

Make Smarter Decisions

See critical navigation objects overlaid on HD video. Surrounding AISequipped vessel traffic and charted navigation aids are clearly identified with rich graphics on a live, dynamic video image.

Recognise and Respond to Nearby Marine Traffic

Colour-coded labels provide instant identification, status, and riskassessment Live AIS Targets. ClearCruise AR provides positive identification of AIS equipped vessels on the horizon.

See Waypoints in the Real World

Major chart objects are identified for instant, heads-up recognition. ClearCruise AR technology shows you visually where your saved waypoints and marks are located.

Understand Complex Navigational Situations

Visualize nearby marks and waypoints for easy navigation. ClearCruise AR technology makes it easy to pick out the buoys marking the edges of the safe channel on a hazy day.

AIS (Automatic Identification System) systems enable the wireless exchange of navigation status between vessels and shore-side traffic monitoring centres. Commercial ships, ocean-going vessels and recreational boats equipped with AIS transceivers broadcast AIS messages that include the vessel's name, course, speed and current navigation status.

AIS700 AIS TRANSCEIVER

The AIS 700 is a Class B Transceiver featuring the latest SO-TDMA Technology. Complete with an internal antenna splitter that allows the AIS to share the antenna with the VHF.

AIS4000 AIS TRANSCEIVER

The AIS4000 boasts a high definition colour display for quick access to integrated charts, alarms, and tracking. Additional support for wired and wireless networking with shipboard systems make AIS4000 a premier SOLAS and Inland Waterwaycertified Class A transceiver.

VHF COMMUNICATIONS

From compact VHF Radios to the ultimate all-in-one communications solution - we have a VHF Radio for every boater! You'll always be heard loud and clear with a VHF Radio from Raymarine. Whether it's our new compact Ray53, full-sized Ray63, or multifunction Ray73, you can depend on your Raymarine VHF Radio for years of trouble-free communication at sea.

Raymarine's Ray53 radio is small in size but big on features and performance. Ray53 is a full-function VHF marine radio with Class D Digital Selective Calling (DSC) and a built-in GPS receiver.

RAY63

The Ray63 offers reliable VHF performance, multi-station control, and intercom capability using optional RayMic wireless and wired controllers. The Ray63 has a built-in GPS receiver and features Class D Digital Selective Calling (DSC).

RAY73

The Ray73 has all of the features, performance, and remote options as the full-sized Ray63 plus an integrated AIS receiver. NMEA0183 and NMEA2000 ports allow the Ray73 to network with chartplotters for AIS and DSC functions.

RAY90

Raymarine's fixed mount Ray90 modular VHF radio bring multi-station communications to a whole new level of power, performance and flexibility. The Ray90 is a black-box design with a transceiver that hides out of sight under your helm, in a locker, or just about anywhere.

RAY91

In addition to being a full featured VHF radio system, the Ray91 also has a built-in Automatic Identification System (AIS) receiver. Ray91 can receive the navigation and safety broadcasts from nearby AIS-equipped vessels and share them with your compatible MFD, chartplotter, radar and instruments.

Raymarine

NEUBOAT 360 DOCK

NEW

We've formed a strategic alliance with Avikus, a pioneering force in autonomous boating, to integrate Avikus NeuBoat technology into Raymarine systems. Raymarine and Avikus enhance your time on the water, ensuring you navigate and dock your boat free from unnecessary worries. The NeuBoat Dock's 360-degree surround view docking camera system for Axiom incorporates Avikus' cutting-edge autonomous technology, empowering you to dock your boat with absolute confidence.

Docking a boat can be stressful. Blind spots, wind, and currents are all conspiring against you. The Raymarine and Avikus Neuboat system makes docking effortless. Neuboat Dock delivers a 360-degree view around your vessel, eliminating blind spots so you can maneuver in tight areas and approach the dock stress-free.

360 DEGREES OF AWARENESS A 6-camera system provides a 360-degree birds-eye view around the vessel.

DOCK WITH CONFIDENCE On-screen distance guides provide visual cues and help you dock in tight spaces.

MULTIPLE VIEWS Enjoy a 360-degree view or view each camera independently with pre-set docking modes.

NEUBOAT 360 DOCK

SIX SURROUND VIEW MONITOR CAMERAS

Installed at the bow, bow-port, bow-starboard, port, starboard, and stern on your vessel, these cameras provides a 360° birdseye surround view of your vessel's immediate surroundings. Six cameras provide coverage for vessels up to 100 ft (30 metres).

AVIKUS CAMERA CONVERSION UNIT

Installed below deck, this unit receives data from the 6 Surround-View Monitor cameras and then transmits the processed data to the connected Object Recognition Unit. For vessels over 50 feet (15 metres), an additional Camera Conversion Unit and network cabling may be required.

OBJECT RECOGNITION UNIT

Installed below deck, the Avikus Object Recognition receives data from the Camera Conversion Unit and then interprets the visual information from all connected cameras into a synchronized view.

AXIOM DISPLAY

At the helm, an Axiom chartplotter display provides simple touchscreen access to the Neuboat Dock user interface and 360-degree camera view.

SIMPLIFIED INSTALLATION FOR BOAT BUILDERS

Designed for new boat construction, Avikus Neuboat Dock from Raymarine offers simplified configuration and commissioning. Calibration can be performed on land or in the water. No cumbersome calibration mats or posts used in other systems are required. Calibration does not require Raymarine personnel to be on-site at the boat factory. NeuBoat Dock can be calibrated remotely with a simple Axiom internet connection via Wi-Fi or a YachtSense Link router.

- For vessels in 50' (15 metres) range
- Includes six surround view monitor cameras
- Includes Avikus camera conversion kit
- Compatible with Raymarine Axiom chartplotters (sold separately)

DOCKSENSE[™] CONTROL - ASSISTED DOCKING TECHNOLOGY

DockSense is available as part of DockSense Control and DockSense Alert systems. DockSense Alert provides enhanced situational awareness to captains. DockSense Control builds on this with a vessels engine and control systems as detailed below. Yachtsense systems are available through boat builders and technical dealers only.

THE DOCKING CHALLENGE

Docking a boat can be a stressful experience, even for the most experienced captains. Often wind and tides make the task more difficult, and docking mishaps can become expensive repairs. The Raymarine DockSense[™] Control system is designed to augment a captain's boat handling skills using the system's Virtual Bumper[™] zone technology around the vessel. Should an object like a piling or another vessel encounter the Virtual Bumper, DockSense[™] Control automatically introduces corrective steering and throttle commands to avoid the object and assist the captain in guiding the vessel to the dock.

THE FUTURE OF BOAT HANDLING

DockSense[™] Control uses global positioning system (GPS) and attitude heading reference system (AHRS) position sensing technology to compensate for the effects of wind and currents, ensuring the vessel enters the dock without drama or costly collisions. The Raymarine DockSense[™] Control systems include multiple FLIR machine vision cameras, a central processing module, and the DockSense[™] Control App running on Raymarine's Axiom navigation display. The system integrates with modern joystick propulsion systems, providing assisted steering and throttle commands to help captains make a smooth arrival.

DOCKSENSE Assisted docking technology

DOCKSENSE[™] ALERT

DockSense Alert is the next generation of Raymarine's intelligent docking technology designed to enhance a captain's awareness of immediate surroundings while manoeuvring the vessel in close quarters. Using advanced stereo vision camera technology, DockSense Alert detects objects above the water line and creates an intuitive map of potential hazards around the boat. Live video feeds enhance the captain's view while audible and visible alerts inform the captain when an object is close to the vessel.

DOCKSENSE ALERT VESSEL INTEGRATION

DockSense Alert systems are designed for professional engineer installation, and each system integrates with Raymarine Axiom multifunction navigation displays. In addition to advanced 3D stereo vision cameras, DockSense Alert systems require precision heading and motion-sensing technology in the form of the AR250 and AR270 DockSense heading sensors. The two sensors combine to create a highly accurate GPS compass system, unaffected by magnetic interference. When outfitting a vessel, Raymarine DockSense experts will partner with your engineering team to design a DockSense Alert system that provides maximum coverage and confidence for you.

DOCK WITH CONFIDENCE

DockSense Alert gives captains the confidence to dock in challenging conditions at any dock, in any location. Unlike other docking assistants, DockSense Alert does not require any complex external dockside beacons or sensors. Raymarine's DockSense Alert is entirely selfcontained and integrated with the vessel's navigation system and ready to use in every docking location.

At the helm, Axiom's DockSense Alert app provides an informative map showing distance to objects around the boat. Live camera feeds provide added confidence by eliminating blind spots and allowing the captain to see what is happening in real-time. DockSense Alert also offers helpful notifications tuned to the captain's preferred proximity alert distance.

YACHTSENSE ECOSYSTEM

The YachtSense Ecosystem enables complete onboard and offboard integration with all devices connected to the boats network.

An installed system assures captains and boat owners of the readiness of their vessel prior to, during and after their voyage. They are always connected to the boat.

Voyage preparations can begin before leaving home, and whilst onboard guests and crew can be connected to the boat.

LEVEL 1: MOBILE COMMAND

RAYMARINE APP

The Raymarine® App can operate independently of YachtSense Link and YachtSense. The app connects directly to Axiom® displays via Wi-Fi.

- Stream and control Axiom multifunction displays from anywhere onboard
- Back-up waypoints, tracks and screenshots on your mobile device

RAYMARINE APP WITH YACHTSENSE LINK

- Remotely access and control YachtSense connected devices
- Monitor your boat remotely with GeoFence and YachtSense Link
- View real time instrument and navigation data

YACHTSENSE ECOSYSTEM

CATEGORY WINNER

LEVEL 2: OFFBOAT CONNECTIVITY

YACHTSENSE LINK

YachtSense Link is a multi-purpose marine mobile router equipped with Raynet Ethernet ports, mobile broadband connectivity, and onboard Wi-Fi. YachtSense Link allows crew and family to connect Axiom® displays, phones, tablets, and PCs to a unified onboard network. YachtSense Link automatically switches between marina Wi-Fi and mobile networks to ensure you are always connected. Combine YachtSense Link with the Raymarine mobile app for remote access to your Raymarine network and enjoy the added security of remote GeoFence vessel monitoring. YachtSense Link also features low-voltage digital switching/monitoring channels for controlling and monitoring onboard electrical devices like pumps, batteries, lighting, and more.

- Mobile broadband connection to 4G (LTE) networks (SIM card and data plan required)
- Supports dual SIM cards for seamless connectivity to international mobile networks
- 4 Raynet Ethernet ports for connecting Raymarine devices
- Integrated GPS with a range extending 4 in 1 antenna (GPS/ GNSS, 3G, 4G, and Wi-Fi)
- Low power consumption mode supports GeoFence remote monitoring (subscription required)
- SeaTalkNG/NMEA2000 port
- 4 x input and output low voltage digital switching channels
- Easy DIY setup using a web browser or Axiom display
- Rugged IPX6 enclosure is shock and vibration resistant

LEVEL 3: SMART HOME ON THE WATER

YACHTSENSE

YachtSense is Raymarine's bespoke digital control system that controls and monitors all of a vessel's electrical and electronics systems. When integrated with the Raymarine app and YachtSense Link, the YachtSense Digital Control System can be remotely accessed and controlled from anywhere there is internet access. Operate onboard equipment, monitor vessel systems, and respond to notifications right from the Raymarine app on your mobile phone or tablet.

YACHTSENSE ECOSYSTEM

LEVEL 1: COMMAND AND CONTROL Stream and control Axiom from your phone or tablet from anywhere onboard.

LEVEL 1: SECURE BACK UP Critical waypoints, routes and tracks can be transferred to your mobile device.

LEVEL 2: REMOTE MONITORING Raymarine GeoFence provides alerts and notifications if your vessel moves in or outside a safety zone.

LEVEL 2: STAY INFORMED Connect and view real time instrument and navigation data on board or remotely.

YACHTSENSE ECOSYSTEM

LEVEL 2: REMOTE MONITORING

Monitor bilge water sensors, battery voltage, shore power, smoke alarms and more. Control is afforded with the addition of a switching relay.

LEVEL 2: ALWAYS CONNECTED

Connect Raymarine equipment, tablets, smart TVs, and other wireless devices to a unified onboard Wi-Fi network with 4G mobile broadband.

LEVEL 3: TOTAL COMMAND OF THE VESSELS ELECTRICAL SYSTEMS

YACHTSENSE

YachtSense Digital Control System

YachtSense[™] is the future of vessel automation. An advanced digital control system, YachtSense gives the captain total command and complete awareness of a vessel's electrical systems. YachtSense offers the most scalable, configurable, and fail-safe marine automation system available. The system offers intuitive control of every device, from lighting, pumps, and sunshades to wipers, windlass, and bathing platforms.

SCALABLE

Unique modular system architecture gives boat builders the freedom to design and standardize on a digital control solution that can scale across an entire model range.

ENGINEERED FOR THE UNEXPECTED

Three layers of redundancy give captains peace of mind. An integrated keypad allows for manual override while the LCD provides system diagnostics. Rugged IPX6 enclosures and backed by 3-year warranty.

YACHTSENSE

MODERN VESSEL AUTOMATION

YachtSense[™] bespoke Axiom user interface options empowers boat builders to create a modern and elegant vessel automation solution. YachtSense gives captains total control from the helm or their mobile device.

Raymarine

WARRANTY

Raymarine's Global Limited Warranty is effective for qualifying products purchased on or after 1st July 2017. Raymarine UK Ltd. and its affiliates ("RAYMARINE") warrants RAYMARINE products purchased directly from RAYMARINE, from an approved RAYMARINE dealer (visit raymarine.eu/DealerLocator to find and contact your local approved RAYMARINE dealer), or installed on a new vessel by an authorized boat builder, known as the Original Equipment Manufacturer (OEM) (the "Products"), to be free from defects in material and workmanship for;

(i) Dragonfly Products for one (1) year ("Dragonfly Limited Warranty Period"); and(ii) Standard Products for two (2) years ("Standard Limited Warranty Period"); from

(a) the date the Products were first purchased; or (b) in the case of Products installed on a new vessel by an authorized OEM, the date the vessel was first delivered (the "Purchase Date") to the first retail customer (the "Original Customer").

All prior RAYMARINE warranty policies, procedures and points of contact are superseded and replaced by this RAYMARINE Global Limited Warranty.

Except for Dragonfly Products, Warranty Replacement Product, Refurbished Product and Products used for regular commercial, military, law enforcement or related purposes, by registering your new Product with RAYMARINE, you can upgrade the 2-year Standard Limited Warranty to a 3-year Extended Limited Warranty at no additional cost.

In some countries and for most Products, RAYMARINE also offers a Warranty Replacement service and On-Board Warranty. These services, when available, are designed to help minimize the down-time of Products that may require warranty repair.

Your Proof of Purchase documentation is important. Please keep it in a safe place. If you need a warranty service your proof of purchase will be required.

RAYMARINE Products are not a substitute for possessing and exercising the independent judgment and skill needed to safely and effectively operate any vessel or engage in any marine activity.

FIND A DEALER

To find your nearest Raymarine dealer, scan the QR code or enter the following URL into your internet browser https://www.raymarine.co.uk/en-gb/find-your-local-dealer

CONTACT US
