The Story (So Far)

Scanstrut is a global leader in marine and outdoor equipment, manufacturing cutting-edge outdoor technologies for over 40 years. We began with a passion for enabling adventure, and we've since grown into a company recognised worldwide for our quality, reliability, and innovation.

With a diverse product range of over 350 items, we enhance the use of navigation, and personal electronics in the outdoors. Our products are organized into five main categories: mounts, charge, connect, air, and seal. Scanstrut remains proudly independent, with headquarters in the UK and the USA. Over the decades, our journey has been marked by numerous industry firsts, including the development of ground-breaking mounting systems and wireless charging technologies for outdoor environments. These milestones have earned us numerous awards.

Every innovation is born in-house, driven by our talented design and engineering team who carry ideas from concept through to production. We ensure that every product meets the highest standards, trusted by customers in the toughest environments.

Our journey is one of passion, precision, and pushing boundaries, and we're excited to keep driving forward, innovating, and enabling your adventures, wherever it may take you.

# Safe • Certified • Approved

The testing standard at Scanstrut is encapsulated by the acronym SCA, which stands for Safe, Certified, and Approved. With over 35 years of experience and expertise in designing products for outdoor use, we design our products to be able to thrive in the harshest of outdoor environments.

Before any product is released, it must pass through our rigorous testing program which involves relevant assessments in electrical, mechanical, U.V., corrosion, thermal, and waterproof categories. To ensure the highest level of accuracy, testing is conducted both internally and by independent accredited test houses.

Our commitment to quality has earned us the approval of renowned names such as Mercury Marine, Grady White Boats, Boston Whaler, Winnebago, Airstream and many more. To learn more about our testing program and certifications, please feel free to reach out to us.

## Testing Process

- On Water Test**  
Dynamic on water testing in harsh coastal conditions. Mounted to a test vessel to evaluate its performance in rough sea states.
- Corrosion Test**  
100-hours of a special formula salt spray that simulates accelerated marine environmental effects on the product.
- IP Test**  
Water and dust protection under test laboratory conditions to international IP standards. We test between IPX4 (waterjet) and IP68 (submersion).
- Impact Test**  
Drop tests to assess the impact of items falling onto our products and ensure they can withstand impacts while being used as intended.
- Cable Bend Test**  
Electrical products are bolted into a specially designed automated jig to mechanically bend the cable -45° to +45° for 3000 cycles. This ensures cables will not fail even after prolonged use.
- On Water Charge Test**  
Using real life on water temperature data to ensure devices will continue to charge at an acceptable speed in extreme cold and hot temperatures.
- Accelerated UV Material Test**  
We accelerate the effects of UV exposure to replicate our products usage in extreme tropical climates. We do this to ensure parts do not become brittle, discolour or fail over time.
- Humidity Chamber Test**  
Similar to our brutal SCA Thermal Chamber Test, but we've added humidity to make it even more punishing.
- Shaker Table Test**  
Shock testing in X / Y / Z and +/- axis at 5G increments up to 30G to evaluate the products strength, particularly relevant for our Radar mounts.
- FEA Analysis**  
Finite Element Analysis, simulates the behaviour of the design in virtual conditions to allow us to optimise the design before prototyping and physical testing.
- 30G Shock Test**  
Shock testing at 30G (30 times the force of gravity) to evaluate strength, particularly relevant for our Radar mounts and other powerboat products.
- Material Test**  
Positive Material Identification (PMI) ensures consistent quality of 316 Stainless Steel and Aluminium products. This controls strength and environmental performance.
- Cable Twist Test**  
Electrical products are bolted into a specially designed automated jig to mechanically twist the cable -45° to +45° for 3000 cycles. This ensures cables will not fail even after prolonged use.
- Thermal Chamber Test**  
Laboratory chamber running from -40°C (-40°F) to +85°C (185°F) and back to -40°C (-40°F) for 120 cycles, this accelerates material ageing to simulate real world environment.
- Temperature Chamber Test**  
Product placed in a laboratory chamber at high temperatures to ensure our products continue to perform as designed.
- On Water Testing Global**  
Similar to SCA standard on water testing, however we select locations and vessels for more varied and challenging environmental conditions.

# Radar Mount

Discover the ultimate solutions for mounting your radar with our premium Radar Mounts. Engineered for stability and durability, our mounts ensure your radar operates at peak performance, even in challenging marine conditions. With easy installation and a sleek design, our mounts seamlessly integrate with your vessel while providing optimal visibility and functionality.

---

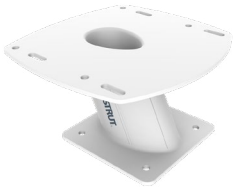

-  Pre-drilled mounting holes to allow radar to fasten straight to the PowerTower
-  No need to cut the radar's connectors off for installation
-  Marine sealant not required
-  2 x heights available
-  Aft or forward leaning designs
-  Marine-grade aluminium
-  Unique 4 step marine paint system

# Aluminium PowerTower®

Scanstrut Aluminium PowerTower has been designed and engineered to install your radar on the roof, T-top, flybridge or radar arch of your powerboat, providing the clearest view of the horizon allowing you to get the best performance from your radar in all conditions.

2 x heights available

# Modular Dual PowerTower®

This “off the shelf custom mount” allows the greatest flexibility for selecting a simple solution that works for your requirements. Mount 2 electronics on 1 footprint, with a choice of 3 main strut types and a range of electronics plates. The Modular Dual PowerTower has been designed to allow your open array or radar & satcom, Starlink or camera to be mounted together with or without navlights, creating that custom mount that is perfect for your boat.

Available in

To build your own Modular Dual PowerTower simply choose your mount, radar plate, top plate & light bar.

See our simple 4 step buyers guide  
Page 16-17 or visit [scanstrut.com](https://scanstrut.com)

Step One

Select Mount

1

DPT-R

Satcom, Starlink or Camera mounted with Radar

Standard installation

Small mounting footprint, saves space on your roof or flybridge

DPT-R-COMP

Satcom, Starlink or Camera mounted with Radar

Compact installation

Low-profile

Small mounting footprint, saves space on your roof or flybridge

DPT-OA

Satcom, Starlink or Camera mounted with Open Array Radar

Small mounting footprint, saves space on your roof or flybridge

Pre-drilled mounting holes allow the radar to fasten straight to the PowerTower with its own mounting bolts

Compatible with

✓ All major radar and satcom manufacturers

✓ All major radar and satcom manufacturers

✓ Garmin

✓ Raymarine

✓ Simrad

✓ Furuno

Step Two

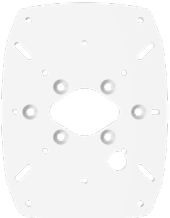

Select Radar Plate

2

Step Three

Select Top Plate

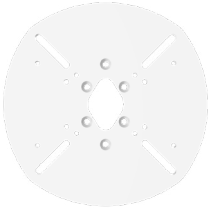

3

DPT-S-PLATE-01

Satcom Plate 1

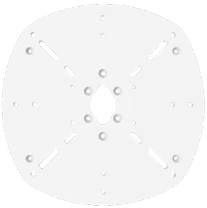

Designed for Satcoms up to 30cm (12")

DPT-S-PLATE-02

Satcom Plate 2

Designed for Satcoms up to 45cm (17")

DPT-S-PLATE-03

Satcom plate 3

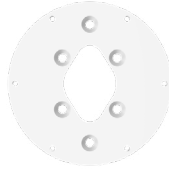

Designed for Satcoms up to 60cm (24")

DPT-C-PLATE-01

Camera plate 1

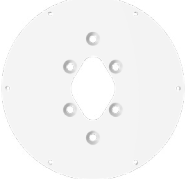

FLIR M series, Sionyx Nightwave Cameras & searchlights

DPT-C-PLATE-02

Camera plate 2

FLIR M100/200 Thermal Imaging Cameras

DPT-C-PLATE-03

Camera plate 3

FLIR M300 Thermal Imaging Cameras

SC-SL-01

Starlink

Designed to fit Starlink High-Performance

Step Four

Select Lightbar

4

Pre-drilled mounting holes allow the radar to fasten straight to the Tapered Mast

No need to cut plugs to install (NMEA plug compatible wings)

Undrilled top plate to fit any light

Marine-grade aluminium

Small base footprint - same as Scanstrut Dual PowerTower

Unique 4 step marine paint system

# Tapered Mast

This flagship radar mount is a single combination mount designed for radar, lights, GPS/VHF antennas, cameras, searchlights and satcom or Starlink. Each item is perfectly positioned for maximum performance.

Available in

★ Available on request

PTM-R1-1  
**Tapered Mast • 2 Devices**  
Colour White  
Material Marine-grade aluminium  
Also mount lights, cameras, GPS/ VHF antenna

PTM-R1-2  
**Tapered Mast • 2 Devices**  
Colour White  
Material Marine-grade aluminium  
Also mount lights, cameras, GPS/ VHF antenna

2

Supplied with two support struts which provide maximum fore/aft and sideways support

For racing or winter storage, simply remove the pole by unscrewing the base and remove pole, leaving just the low profile base on deck

2 x heights available

# Pole Mounts

SC100 pole mount range installs your radar onto the deck or transom of your boat. Supplied as a complete kit, you will have everything you need for your installation. The anodized aluminium base gives choice when deciding where you wish to install the pole mount, it has a rotation of 360 degree that enables the pole to be installed on both sloping transoms and level decks. The Pole features two cable channels with a cover strip to hold cables in place and out of view. Perfect choice for the serious bluewater cruiser as you can mount various accessories including the SC120 Lifting Crane and Deck Lights.

Available in

SC101

Height 1.9m (6.4')

SC102

# Self Levelling Radar Mounts

Self-levelling mount range ensures your radar stays level with the horizon at all times for optimum performance.

Available in

## Backstay Leveller

- Designed to fit the most up to date radars from Garmin, Raymarine, B&G and Furuno.
- Available positioned forward or aft of backstay.
- Features a fine-tuned damping system which reacts to major changes in heel angle of the boat.
- 2.6m (8'6") aluminium mounting pole, supplied in 2 lengths.
- Base can be deck, transom or chainplate mounted.
- Can be installed on both adjustable and split backstays
- Clamps around backstay allowing cable tension to be adjusted.
- Additional 0.6m (23.6") and 1.3m (51.1") lengths available to mount your radome higher.
- No power required
- Oil filled damping chamber

## Mast Leveller

- Designed to fit the most up to date radars from Garmin, Lowrance, Raymarine, B&G and Furuno
- Anodised aluminium damping chamber
- 316 stainless steel radar cradle
- No power is required
- GPS/VHF accessories available
- Oil filled damping chamber

## Pole Leveller

- Complete kit including base, pole, levelling cradle, deck strut & rail standoff.
- Leveller Mounted on 2.5m SC100 Pole Mount
- 316 stainless steel radar cradle
- Maintenance-free
- No power is required
- GPS/VHF accessories available
- Oil filled damping chamber

Backstay Levellers

**LMB-F1**  
Mounts forward of the backstay  
2.6m (8'6") aluminium mounting pole

-  External antenna fixings for easy installation and maintenance
-  Watertight installation
-  Single piece composite GRP moulding or 316 stainless steel
-  No need to remove connectors

# Satcom Antenna Mounts

Scanstrut Antenna Mounts are manufactured from a single piece composite GRP moulding or 316 stainless steel for high strength, corrosion-free mounting. Your chosen antenna will fix on through external fixings and pre-drilled mounting holes, this makes them easy to install and maintain. All the cable routing for the antenna is through the base of the mount which leaves a clean and simple finish.

**SC30**

Manufactured from a single piece of composite GRP moulding

Reduce the overall footprint of your antenna by up to 55%

External fixings and pre-drilled mounting holes

Easy to install and maintain

**SC35**

Manufactured from a single piece of composite GRP moulding

Reduce the overall footprint of your antenna by up to 30%

External fixings and pre-drilled mounting holes

Easy to install and maintain

**SC45**

Manufactured from a single piece of composite GRP moulding

Reduce the overall footprint of your antenna by up to 45%

External fixings and pre-drilled mounting holes

Easy to install and maintain

**SC45R**

Manufactured from a single piece of composite GRP moulding

Reduce the overall footprint of your antenna by up to 45%

External fixings and pre-drilled mounting holes

Easy to install and maintain

**SC65**

Manufactured from a single piece of composite GRP moulding

Reduce the overall footprint of your antenna by up to 55%

External fixings and pre-drilled mounting holes

Easy to install and maintain

# Scanpod

Concise and well designed, our Scanpod Range offers maximum choice and versatility for installing all leading brands of instruments and screens. The range offers contemporary styling and a unique seal and fixing system to provide full instrument protection. Ensuring you get the very highest quality installation on the market. Our Scanpods achieve the perfect viewing angle for your electronics every time.

- Helm Pod** The perfect choice for all cockpit configurations. With options to fit radar displays, chart plotters and standard navigation instruments.
  - Deck Pod** Simply release the lever, swivel and tilt to suit your perfect viewing angle.
  - Rail Pod** Perfect for installations where there is limited space available.
  - Arm Pod** Install your MFD onto any standard or curved rail, right where you need it the most.
-

-  Universal helm fitting
-  Fits pedestal rails from 25mm to 33.7mm (0.98" – 1.33") diameter
-  Saddles allow internal tube cable routing
-  Watertight seal and cable entry
-  Saddle system supports the stainless tubing enabling a secure and rigid fit onto any pedestal
-  Quick and safe install & repeat servicing
-  Pod seal is manufactured from a high tear strength silicone with a very high resistance to heat and UV
-  As standard, you will receive your Scanpod uncut. For a small charge, factory cutting service is available.

# Helm Pod

Scanstrut Helm Pod is a perfect choice for all cockpit configurations. With options to fit radar displays, chart plotters and standard navigation instruments, the choice is yours! Scan the QR code against each product to check compatibility.

Available in

Instruments

**SPH-3I-W**  
Fits 3x Standard Nav Instruments & Autopilots

**SPH-4I-W**  
Fits 4x Standard Nav Instruments & Autopilots

**SPH-4XI-W**  
Fits 4x Standard Nav Instruments& Autopilots  
Features an angled face to improve user viewing

Accessories

**FM-1**  
**Flex Mount - Small**  
Easy to use quick release lever - tilt display forward / back for improved instrument viewing  
Cables exit the back of the Pod and into the pedestal/rail using a watertight grommet  
Fits 1" and 1 1/4" rail sizes and requires a minimum of 60mm (2.4") of straight rail to mount  
**Compatible with** SPH-9-W, SPH-3i-W, SPH-4i-W, SPH-4xi-W

**FM-2**  
**Flex Mount - Large**  
**Compatible with** SPH-12-W, SPH-13-W

MFD

**SPH-8-W**  
Fits up to 9" displays  
Fits 8" centres

**SPH-9-W**  
Fits up to 9" displays  
Fits 12" centres  
Designed for the most up-to-date screens

**SPH-12-W**  
Fits up to 12" displays  
Fits 12" centres

**SPH-13-W**  
Fits up to 12" displays  
Fits 12" centres  
Designed for the most up-to-date screens

**SPH-15-W**  
Fits up to 16" displays  
Designed for large screens or multi-screen installations

**SPH-SYSTEM-W**  
Fits up to 12" displays and instruments

Instruments & MFD

SCANPODS

As standard, you will find your Scanpod uncut.

Inner bracing plate secures the Deck Pod base to the pod and gives increased rigidity

Install on virtually any flat surface

360° viewing angle

High UV & heat resistance

One-handed quick-release action

Hidden internal cable routing through base

# Deck Pod

Concise and well designed, Scanstrut Deck Pod range offers maximum choice and versatility for installing all leading brands of instruments and screens. The range offers contemporary styling and a unique seal system to provide full instrument protection. Ensuring you get the very highest quality installation on the market, choose the Scanstrut Deck Pod and achieve the perfect viewing angle for your electronics every time. Scan the QR code against each product to check compatibility.

SCANPODS

- Viewing angle can be set upon installation
- Fit your display onto standard and curved rails
- Range fits rails from 25mm to 33.7mm (1" - 1 1/4")
- Watertight seal and cable entry
- Cables are routed internally through the clamp and onto the rail
- Quick and safe install & repeat servicing
- Pod seal is manufactured from a high tear strength silicone with a very high resistance to heat and UV
- Fixings fit from back to front cutting their threads into injection moulded ABS inserts designed into the Pod front

# Rail Pod

Scanstrut Rail Pod allows you to install your MFD (Multi Functional Display) onto any standard or curved rail and is perfect for installations where there is limited space available.

Available in

**SPR-1I-RM**  
Fits 1 standard instrument  
Fits rails from 25mm to 33.7mm (0.98" to 1.33")  
Cables are routed internally into the rail

**SPR-1U-RM**  
Fits small screens, switches, controllers, chain counters and more  
Fits rails from 25mm to 33.7mm (0.98" to 1.33")  
Cables are routed internally into the rail

**SPR-7S-RM**  
Fits 7" displays or standard Instruments  
Fits rails from 25mm to 33.7mm (0.98" to 1.33")  
Cables are routed internally into the rail

**SPR-7-RM**  
Fits 7" - 8" displays  
Fits rails from 25mm to 33.7mm (0.98" to 1.33")  
Cables are routed internally into the rail

**SPR-8-RM**  
Fits 8" and 9" displays  
Fits rails from 25mm to 33.7mm (0.98" to 1.33")  
Cables are routed internally into the rail

Scan for compatibility

-  Fit onto standard curved rails
-  Quick and safe install & repeat servicing
-  Cables routed internally through the clamp and onto the rail
-  Anodised aluminium arm

# Arm Pod

Scanstrut Arm Pod allows you to install your display onto any standard or curved rail. Waterproof internal cable routing allows you to seamlessly run your cables through the bottom of the pod, through the multi-adjustable aluminium clamp and into the rail. This gives you the cleanest and most user-friendly way to mount your MFD (Multi Functional Display) right where you need it the most. Designed for both MFD's and instruments and available for 5" up to 9" displays.

Available in

**SPR-1i-AM**  
Fits 1 standard instrument  
Fits rails from 25mm to 33.7mm (0.98" to 1.33")  
Cables are routed internally into the rail

**SPR-1U-AM**  
Fits small screens, switches, controllers, chain counters and more  
Fits rails from 25mm to 33.7mm (0.98" to 1.33")  
Cables are routed internally into the rail

**SPR-7S-AM**  
Fits 7" displays or standard Instruments  
Fits rails from 25mm to 33.7mm (0.98" to 1.33")  
Cables are routed internally into the rail

**SPR-7-AM**  
Fits 7" - 8" displays  
Fits rails from 25mm to 33.7mm (0.98" to 1.33")  
Cables are routed internally into the rail

**SPR-8-AM**  
Fits 8" and 9" displays  
Fits rails from 25mm to 33.7mm (0.98" to 1.33")  
Cables are routed internally into the rail

# USB Charging Waterproof while in use

The waterproof while-in-use series is a game-changer, letting you fast charge without any charging ports being exposed to water. Made with cutting-edge marine-grade materials and designed with longevity, reliability, and ease of use in mind. This series is a great addition to any boat if you want to up your level up your charging experience.

Available in

SC-USB-02  
**ROKK Charge+**  
IP Rating IPX6

Featuring 2 x USB-A charging port  
Fast charge  
Waterproof with 1, 2 and even no cables plugged in  
Ultra-low profile

Standard barrel size ø29mm (1/18") hole cutout.  
USB – A output  
2.1A

SC-USB-03  
**ROKK Charge Pro**  
IP Rating IPX6

Featuring a USB-A and USB-C charging port  
Fast charge  
Waterproof with 1, 2 and even no cables plugged in  
Ultra-low profile

Standard barrel size ø29mm (1/18") hole cutout.  
USB – C output  
60W max on 24V system  
36W max on 12V system  
USB – A output  
2.1AW max

 IPX4 waterproof

 12 / 24V

 Marine-grade materials

 Contains optional front-fit bezel

 Marine sealant not required

 Low profile

# Flip Pro

Scanstrut Flip Pro USB Charge range is a cutting-edge marine-grade charging solution designed to provide reliable and fast outdoor USB charging. The range of chargers combines durable construction, advanced USB and 12V technology, and a user-friendly design to ensure trouble-free charging experience while on the water.

Available in

**SC-12V-F1**  
**Flip Pro 12V Power Socket**  
**IP Rating** IPX4 when lid is closed  
**Voltage** 12V

All chargers are supplied with a front-fit bezel

Features male spade terminals

USB CHARGING

- 12V & 24V
- Available as Dual USB-C ports or USB-A and USB-C
- Ultra-low profile
- Tiny foot print
- Available in 316 Brushed Stainless Steel or Matte black
- Conformal coated electronics, protected against moisture
- Supplied with 150mm (6") flying lead for easy installation into tight spaces
- Modernise your boats interiors

New

# TILE Series

## Tiny Interior Lifestyle Electronics

The Scanstrut TILE Series offers sleek, high-performance charging solutions designed specifically for marine interiors. With elegant bezel options in matte black or premium 316 brushed stainless steel, these chargers blend seamlessly into luxury marine environments. Featuring a compact 40mm square footprint and requiring just a 29mm hole saw for easy installation, the TILE Series combines functionality and style, making it the ideal choice for modernizing your vessel's interior. Enhance your boat's space with this practical, sophisticated solution for everyday device charging.

Range Electrical Info	
Input Voltage	10-30V DC (12/24V System)
Input Current Max	6A (10A fuse recommended)
Standby Power Draw	0.01W

**Important information**

To maximize charge performance, use the cable supplied with your tablet, phone etc. (C to C, or C-lightning) Phones charge at the same speed on either a 12 or 24V system, but a 24V system must be used to get the full 60W output for increased charge speed with laptops.

Black Bezel      Brushed Stainless Steel Bezel  
SC-TILE-10 | SC-TILE-11

**TILE - USB-A / USB-C Interiors Charging Socket 12/24V**

Voltage 12V & 24V

Type A/C Dual USB Charger

Protocol QC & PD

USB-A (12V System)  
5V / 9V / 12V = 3A Max

USB-C (24V System)  
5V / 9V / 12V / 15V / 20V = 3A Max

Universal fit for any USB-C connectors

60W fast charge on 24V system USB-C only

Black Bezel      Brushed Stainless Steel Bezel  
SC-TILE-20 | SC-TILE-21

**TILE - USB-C / USB-C Interiors Charging Socket 12/24V**

Voltage 12 & 24V

Input Current Max 6A

Output 60W max on 24V system / 36W max on 12V system

Protocol QC & PD

USB-C (12V System)  
5V / 9V / 12V = 3A Max

USB-C (24V System)  
5V / 9V / 12V / 15V / 20V = 3A Max

Universal fit for any USB-C connectors

Fast charge (60W max) up to 2 devices at a time

Tile USB is FAST! It will charge at 36W on a 12V system or up to 60W on a 24V system. This makes it perfect for charging modern laptops and large tablets, phones and any other USB-C powered devices onboard.

# Waterproof Wireless Charging

Fully encased and waterproof rated IPX6, this range of Waterproof Wireless chargers is here to bring powerful, charging, no matter the location or weather!

With options for single, triple-coil, and Mag compatible technology, these Qi-certified chargers deliver seamless charging without cables, making them perfect for outdoor environments or creating a clutter-free interior.

This innovative series of products ensures your devices are always charged and ready to go.

---

-  IPX6 waterproof
-  Wireless charge
-  Marine-grade materials
-  Mag Compatible
-  15W output
-  Qi-2 Certified

**SC-CW-14G**  
**Ultra • Magnetic Charger - 12/24V**

Experience the power of Ultra, the first Qi2-certified, mag-compatible marine-grade phone charger.

Built for durability and performance, it features an IPX6 waterproof rating (front and back) and toughened glass. Ultra is fast - our smallest and fastest waterproof wireless charger yet!

With our Mag technology, your Apple iPhone magnetically locks into the optimal charging position, delivering a secure and reliable connection every time.

- Features**
- Qi-2 certified
  - Mag technology
  - Made from toughened glass
  - Surface Size** 605mm x 605mm (2.38" x 2.38")

# Connect

## Ventura Series

The Scanstrut Ventura Series delivers compact, uniform utility sockets engineered to withstand the harshest marine environments.

Perfect for boats and yachts, Ventura provides quick, seamless access to essential onboard utilities; 12V power, USB-C, solar, water, TV, and AC power connections.

Each socket features a premium, low-profile design with a spring-loaded, click-shut lid. Rated IP68 & IP69K waterproof when closed, Ventura keeps your connections protected in heavy washdowns and offshore spray. With high-performance materials, true marine-grade engineering, and a unified aesthetic across the range, Ventura combines durability and design in one powerful package.

**Receptacle** • Grounded duplex NEMA 5-20R - UL & CSA-listed  
• Screw terminals  
• Replace receptacle only with Scanstrut part number SC-UTIL-P-006285 (Qualtek 740W-F/06)

**SC-V-USB-01**  
**Dual USB-C Socket**  
**IP Rating** IP68 & IP69K (with lid closed)  
**Input Voltage** 10-32V DC  
(12/24V System)  
**Input Current Max** 6A  
**Output Type C**  
12V System  
5V=3A, 9V=3A, 12V=3A Max  
24V System  
5V=3A, 9V=3A, 12V=3A, 15V=3A, 20V=3A Max

**SC-V-DC1**  
**12V Power Outlet**  
**IP Rating** IP68 & IP69K (with lid closed)  
**Input Voltage** 10-15V DC  
(12/24V System)  
**Output Max** 150W

**SC-V-TV1**  
**SAT Connection**  
**IP Rating** IP68 & IP69K (cover closed)  
**Connection Type** Dual F-Type Coaxial  
**Connection Material** Nickle-Plater Brass  
**Impedance** 75Ω  
**Applications** Satellite & TV Systems

**SC-V-W1**  
**Quick-Connect Cold Water Outlet with Wash Down Kit**  
**IP Rating** IP68 & IP69K (cover closed)  
**H x W** 69.3mm (2.73") x 110.2mm (4.34")  
**Install Depth** 48.0mm (1.89")  
**Max Water System Pressure** 8 BAR (115 PSI)  
**Hose Type** 3m (10ft) length coiled PU material  
**Hose Diameter** 9mm (0.35")  
**Sprayer Type** • Full stainless-steel construction  
• Locking flow switch  
• Adjustable spray pattern

## Air

As the go-to Air on Board solutions provider, Scanstrut offers a range of off-the-shelf systems for various leisure marine inflatables, ensuring seamless integration and reliable performance. Trusted by major boat manufacturers, Scanstrut is a global leader in onboard technology solutions.

7.80 x 11.69 x 4.33"

# ATMOS

## 12V Integrated Air Station

This beautifully designed, in-built air station is here to maximize quality time on the water. At the push of a button, ATMOS is ready to inflate your paddle boards, towables and more: simply set the target pressure and let ATMOS do all the hard work. Utilizing Scanstrut outdoor technology DNA, this is waterproof on-board air that's engineered to thrive in the harsh marine environment.

NEW  
SC-AOB-A2

### ATMOS 12V Integrated Air Station

Featuring next-gen air pump technology to provide fast, effortless inflation (and deflation) for your on-water toys. Compact and shallow, ATMOS fits into almost any panel on board such as seating, consoles, or near the swim platform. Now you have ready-to-go air, right where it's needed, for even more family fun on the water.

Easily installed into any panel using 10 self-tapping screws, with a foam gasket included to ensure a secure and waterproof fit. As a standard ATMOS comes with a 2.5m / 8ft hose. Alternatively a 3.6m / 12ft hose is available [SC-AOB-A-HOSEV-12](#)

At Scanstrut, our SCA standard – Safe, Certified, Approved – ensures products thrive in challenging outdoor conditions. Each product undergoes rigorous testing for outdoor reliability and performance by our internal test engineers and accredited test houses.

## Cable Seals

This range of cabling solutions eliminates the need for time-consuming, substandard cable routing and messy sealants, ensuring a 100% watertight installation for your marine cables every time.

---

- 100% watertight
- Easy fit cable routing
- Marine sealant not required
- Perfect for your antenna and navlight cables
- Ultra strong & impact resistant
- UV stable & hard wearing
- Split bung

# Vertical Cable Seals

This premium IP68 waterproof range provides easy fit cable routing that cuts down your installation time. Designed for a range of cable & connector diameters (no minimum diameter) and with options for 2mm to 40mm / 0.07” to 1.57” connectors, making it ideal for almost every installation.

CABLE SEALS

100% watertight

Easy fit cable routing

Marine sealant not required

Perfect for your antenna and navlight cables

Ultra strong & impact resistant

UV stable & hard wearing

# Low Profile Cable Seals

This low-profile design reduces the overall seal height by over **70%** when compared to the standard range by concealing the seal technology below the mounting surface. This results in a clean and more refined appearance and enables installation in the tightest of spaces.

Available in

# Through Bulkhead & Junction Boxes

Available in

**TBH-4**  
**Through Bulkhead**  
For 4 x 16mm (0.15" x 0.62") cables  
For bulkheads 10mm to 35mm (0.39" to 1.37") thick

**TBH-10**  
**Through Bulkhead**  
For 10 x 7mm (0.39" x 0.27") cables  
Fit to any bulkhead 10mm to 35mm (0.39" to 1.37") thick

**SB-8-5**  
**Junction Box**  
**Material** Marine-grade polypropylene  
Features 5 screw-down terminals, offering 5 terminations  
Additional SB-2G Cable seals required for IP67 installation

**SB-8-10**  
**Junction Box**  
**Material** Marine-grade polypropylene  
Features 10 screw-down terminals, offering 10 terminations  
Additional SB-2G Cable seals required for IP67 installation

**SB-2G**  
**Junction Box Connectors**  
Upgrade your Scanstrut Junction Box to IP67  
Works with both the SB-8-5 and SB-8-10
